

N Male Right Angle Field Termination LMR 240 | 123-14NMR | 123e.com

Part Number: 123-14NMR

The **N Male Right Angle (90) LMR-240 Field Terminated Connector** is a high-performance coaxial connector specifically engineered for use with LMR-240 cables. Designed to provide reliable and durable connections, this N Male Right Angle connector ensures strong mechanical and electrical performance across various RF and microwave applications.

Key Features:

- **Impedance:** 50 Ohms, tailored for high-frequency and low-loss applications.
- **Applications:** Suitable for RF applications in cellular networks, radio communications, and antenna systems, where high-quality signal performance is essential.
- **Temperature Range:** Reliable operation between -65C and + 85C, suitable for various environmental conditions.
- **Compliance:** RoHS compliant for environmentally responsible use.

CROSS REFERENCE

Alternative To	RFN-1009-X-04
----------------	---------------

PHYSICAL SPECIFICATIONS

Options	Field Installed
Connector A	N Male Right Angle (90) crimp
Gender	Male
Insulation	PTFE

ELECTRICAL SPECIFICATIONS

Frequency Range	DC-11GHz
Impedance	50 ohms
VSWR	1.5 max @ 9GHz

ENVIRONMENTAL SPECIFICATIONS

Operating Temperature	-65°C to 85°C
-----------------------	---------------
